Relay protection serial port connected to 2m

	P3U30 - universal protection relay, PowerLogic P3U30 universal protection feeder and motors.
	Operation Using the System Interface Control of switching devices can be performed via the serial system interface and a connection to the switch-gear control and protection system.
	RS485-HUB-2P is an industrial grade isolated RS485 hub that can expand 2-ch RS485 sub ports through 1-ch RS485 master port. It can realize signal relay, extension and isolation functions of ...
	This protective device is used to perform primary or back-up circuit protection on medium or high voltage feeders or transformers and down stream protection for utility and industrial switchgear.
	Looking for a reliable RS-232 relay? These controllers connect to any standard COM port and offer simple relay control for switching lights, motors, and devices.

Discover protection relays for generators, motors, transformers, feeders and busbars, designed for reliable and efficient power system protection.

The 2S/2M configuration does not offer any meaningful performance benefit over a 2S/1M SLH-A7 configuration and is not a preferred system. To obtain additional performance beyond a 2S/1M ...

Discover protection relays for generators, motors, transformers, feeders and busbars, designed for reliable and efficient power system protection.

General information with regard to design, configuration, and operation of SIPROTEC 4 devices are set out in the /1/ SIPROTEC 4 System Description.

The RED670 IEDs feature phase-segregated current differential protection with excellent sensitivity for high resistive faults and secure phase selection for up to five line terminals. Two- or three-winding ...

REX640 is a powerful all-in-one protection and control relay for use in advanced power distribution and generation applications with unmatched flexibility available during the complete life cycle of the ...
