

Router will be connected to fiber optic cable later

Overview

In most cases, yes, you can use your existing router with fiber optic internet, provided it has a WAN (Wide Area Network) Ethernet port and your ISP provides a modem/ONT with an Ethernet output. This communication typically happens through an Ethernet port. The critical factor is not the **type** of internet coming. While routers are designed to connect to a modem, the type of modem and the connection protocol are where compatibility with fiber becomes a crucial consideration.

Router will be connected to fiber optic cable later

Master connecting a fiber optic cable to your router with tips, setup instructions, and configuration for optimal internet connectivity.

These days, your wireless router is not just your lifeline to the internet, but also to your job. We've hand-tested the top routers so you can find the right fit to build a snappy home Wi-Fi...
