Safe City Serbian Fiber Optic Array Low Loss

Overview

BELGRADE -- The Serbian government is substantially expanding its advanced Chinese-made surveillance system, leaked documents reviewed by RFE/RL show, despite years of protests and backlash from the public over its use. The Safe City project was introduced in the Serbian cities of Belgrad, Nowy Sad, and Smederevo by Chinese sectors of advanced technologies. FIBRAIN provided fiber optic cables from 12 to 144. One purchase order from March 2024 shows plans to expand Serbia's eLTE system, the private citywide hotspot that links the surveillance equipment and software that forms Huawei's Safe City project and allows it to operate. We provide custom development and manufacturing, from prototype to series production.

Safe City Serbian Fiber Optic Array Low Loss

Safe City - video surveillance in Belgrade, Serbia - Polish producer in photonics and fiber optic sector. The Safe City project was introduced in the Serbian cities of Belgrad, Nowy Sad, and Smederevo by ...

Serbian authorities maintain that facial-recognition software is not yet deployed through the Safe City project, but they have tried to legalize biometric surveillance multiple times before ...

On the EU''s periphery, Serbia has deployed enough biometric surveillance technology from China''s Huawei for law enforcement and “Safe City” solutions to cover practically all of ...

Low loss optical fibers are defined as optical fibers that exhibit minimal attenuation, with current records reaching as low as 0.142 dB/km at 1560 nm, which enables efficient long-distance data transmission.

In this paper, we comprehensively review the progress in the development of HCFs including fiber design, fabrication and parameters (with comparisons to conventional single-mode ...
