Standard for Coefficient of Friction of Optical Cable Outer Sheath

Overview

IEC 60794-1-130:2025 describes test procedures to evaluate the coefficient of dynamic friction of the sheathing material of a cable when pulled over or between other cables. If you require access on more devices, you need to purchase additional licenses. Save up to 50% on this Standard by. If you have any questions about IEC copyright or have an enquiry about obtaining additional rights to this publication, please contact the address below or your local IEC member National Committee for further information. The International Electrotechnical Commission (IEC) is the leading global. Basic optical cable test procedures. Coefficient of friction between cables, Methods E30 This document is password protected. Please enter a password Start making annotations and filters will appear here. Click. Optical fibre cables - Part 1-130: Generic specification - Basic optical cable test procedures - Mechanical tests methods - Coefficient of friction between cables, Methods E30 Expand Your Knowledge and Unlock Your Learning Potential - Your One-Stop Source for Information! Guidance on techniques for the measurement of the coefficient of friction (COF) between cables and ducts IEC/TR 62470:2011 (E) describes three techniques to measure the coefficient of friction (COF)

We provide insurance, retirement and investment products and services. Work with our team of remarkable people united by compassion and a genuine desire to help others.

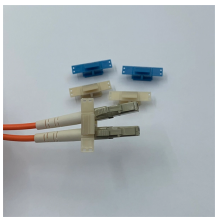

BS EN IEC 60794-1-130:2025 Optical fibre cables - Part 1-130: Generic specification - Basic optical cable test procedures - Mechanical tests methods - Coefficient of friction between cables, Methods E30

This part of IEC 60794 applies to optical fibre cables for use with communication equipment and devices employing similar techniques and to cables having a combination of both optical fibres and electrical ...

IEC 60794-1-130:2025 describes test procedures to evaluate the coefficient of dynamic friction of the sheathing material of a cable when pulled over or between other cables.

A standard is an ideal or set of criteria that you use to judge things against. Colleges have certain standards for applicants, like a minimum SAT score or an above average grade point average.

If the cable is required to be installed by pushing into conduits, a low friction sheath may optionally be adopted, which has both a low coefficient of friction between cables and conduits or other cables and ...
