Surge arrester relay protection

With a surge current rating of 300,000 Amps and type 2. Designed for 480Y/277VAC three phase systems. This product is UL and CSA certified.

A surge arrester is a protective device for limiting voltage on equipment by discharging or bypassing surge current. It prevents continued flow to follow current to ground and it is capable of repeating ...

Surge arrester solutions, products and services Medium- and high-voltage surge arresters for the safe and reliable protection of electrical equipment. Surge arresters are essential in safeguarding valuable ...

Surge Protective Devices are designed to protect against transient surge conditions. Large single surge events, such as lightning, can reach hundreds of thousands of volts and can cause immediate or ...

Our innovative, reliable surge protection solutions help reduce costly downtime by protecting sensitive electrical and electronic equipment against the damaging effects of transients.

Our carefully selected range of devices includes distribution class surge arresters, bayonet fuses, and Buchholz relays, Wildlife guard – all designed to detect, isolate, and mitigate electrical faults before ...

Surge Arresters Catalog MacLean Power Systems offers a full range of polymer housed surge arresters meeting the needs for transmission, substation, distribution and secondary surge protection. With ...

By utilizing a direct bus bar connection, Eaton SPDs achieve very low let-through voltage rating to effectively suppress both high and low energy transient events and provide protection for all ...

From feed-in to the end device, we offer you a comprehensive portfolio of surge protective devices for power supplies.

Surge Suppressors are used to suppress the high voltage spike that is generated when a relay or contactor coil is de-energized. The electromagnetic field collapsing across the coil generates a ...
