

Telecom cannot connect to the internet displaying a broken fiber optic cable

Overview

Simply shine the flashlight or laser pointer in to one end of the cable, if you don't see the light come through the other end, the cable is broken and will need to be replaced. If you are unable to access the internet or experience frequent disruptions in your connection, it could be an indication of a damaged cable. However, diagnosing fiber optic cable issues goes beyond. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. This guide will walk you through diagnosing and resolving common fiber network issues efficiently. Let's start with A: the basics.
