The components of a secondary distribution box include

Overview

The main parts are the Miniature Circuit Breaker (MCB), Residual Current Device (RCD), busbars, and the main switch. Safe habits and checking the box often help stop electrical accidents. If you know. Inside a distribution box are components like circuit breakers, earth leakage units, doorbells, and timers. The building's electrical power enters through the main feeding cable, which connects to the distribution board. A spot network load of up to 25 MVA may be supplied by as many as six primary feeds. Nearly all spot networks in North America function at a 480Y/277-V secondary voltage.
