The distribution box has no terminal blocks

Overview

The primary role of a distribution box is to take the main incoming supply and divide it into smaller circuits. Each outgoing line can be individually controlled, making it possible to isolate or maintain one section of the system without disrupting the whole. Murrelektronik supplies a comprehensive range of distribution boxes: They create optimum installations for any application and are cost-effective, reliable. Start your sales inquiry online and an expert will connect with you. Find support resources for all your needs, in one place. The FIX blocks can be used straight away and extended as needed.
