The router keeps dropping connections after I switched to 100M fiber optic internet

Overview

Restarting your router, updating its firmware, and checking your connection cables often resolve the issue. Check Indicator Lights : A “LOS” (Loss of Signal) LED on transceivers signals connectivity issues. Configuration errors are a hidden culprit: Firmware Updates : Ensure all devices run the latest firmware. A router glitch, faulty cabling, or congestion on your home network can bring your speeds to a standstill. Luckily, these issues are often easily solved with a few simple troubleshooting steps.
