

Top of the communication tower

Overview

The Grand Staircase offers a steep climb toward a panoramic view and is commonly known as "The Steps" or "The Stairs. A mast radiator or radiating tower is one in which the metal mast or tower itself is energized and functions as the transmitting antenna. However, in structural engineering terms, a tower is a self-supporting or cantilevered structure. This 252 step staircase offers stunning views of San Jose. These towering structures form the backbone of mobile networks, enabling everything from voice calls to high-speed internet access, making digital connectivity possible. On November 29, 1777, Juan Bautista de Anza selected the area to.

Top of the communication tower

Known as the "Oak Hill" tower and constructed in 1972, it was designed to hold KS-15676 horn antennas to relay data between the San Jose long lines tower (located at Almaden Blvd and West San ...
