UK Optical Router OSFP

Overview

OSFP (Octal Small Form Factor Pluggable) is a pluggable optical transceiver interface standard that supports eight electrical lanes (Tx/Rx) per module. Each lane can operate up to 100G PAM4, allowing total bandwidths of 400G or 800G depending on configuration. This article will introduce the technical features and differences of 400G OSFP/QSFP-DD/QSFP112 modules, presenting the FS 400G module product list and application scenarios to meet various deployment needs. Unlike the backward-compatible QSFP-DD, OSFP introduces a slightly larger mechanical form to.
