Power distribution has always been one of our core strengths, and our industry-leading technology includes distribution boxes, start-stop modules, body electronics and security systems.

The High Voltage Power Box combines the functionality of an Onboard Charger (OBC), a DC/DC converter and a PDU (Power Distribution Unit). The OBC is the interface between the car ...

Designed to make wiring for dual input (vehicle/solar) DC-DC chargers painless and straightforward, the APDS replaces many of the bus bars, fuse blocks, ring terminals and the rats nest of wires typical of ...

The Automotive Power Distribution Box is essential for managing and distributing electrical power throughout a vehicle to ensure that various components operate efficiently and reliably.

These boxes control and distribute the flow of electrical power to various systems and components within a car, such as the engine, transmission, lights, HVAC, radio, and power windows.
