

Warranty warranty for hybrid optical electrical cable QSFP28

Overview

Providing industry-leading limited lifetime warranty. Refunds will be received about 5 business days after the receipt of returned items. 2W Fully compatible with Cisco switches, for Compatible Matrix, please click here. Power. NVIDIA® MFA1A00 is a QSFP28 VCSEL-based (Vertical Cavity Surface-Emitting Laser) active optical cable (AOC) designed for use in 100Gb/s InfiniBand (IB) EDR (Enhanced Data Rate) and Ethernet systems. The MFA1A00 AOC offers high port density and configurability, and a much longer reach than passive. The image shown may not exactly represent the actual part. Click Image to Enlarge Amphenol's 100G QSFP28 to QSFP28 Active Optical Cable assemblies are a reliable, cost and power efficient, integrated solution which is ideal for high density signal transmission typically seen in most storage, data. This solution can be deployed with a single active optical cable (AOC) with integrated QSFP28 and SFP28 transceivers or by a passive fiber breakout cable/multiplexer. To maximize front panel density, some Dell switches support QSFP28- DD (double density) modules which transport two 100GbE data. Among the many optical form factors, QSFP28 (Quad Small Form Factor Pluggable 28) has emerged as the industry workhorse for 100 Gigabit Ethernet

(100GbE) networks.

Warranty warranty for hybrid optical electrical cable QSFP28

The Arista pluggables and cables include a one-year limited hardware warranty, which covers parts, repair, or replacement with a 10 business day turn-around after the unit is received.

Cable data sheet (AOC Cable, ...

NVIDIA makes no representation or warranty that products based on this document will be suitable for any specified use. Testing of all parameters of each product is not necessarily performed by NVIDIA.

These high performance and low power consumption AOCs are Ethernet, InfiniBand and MSA compliant with a robust construction, including a high-strength pull tab latching system which reduces plug loss ...

These cables are available in lengths from 1 meter to 20 meters and are terminated in connectors that are inserted directly into the QSFP28 or SFP28 cages in place of optical modules. The following ...

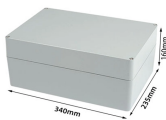

Amphenol's 100G QSFP28 to QSFP28 Active Optical Cable assemblies are a reliable, cost and power efficient, integrated solution which is ideal for high density signal transmission ...

Drive high-speed connectivity enabled by multiple (4 or 8) parallel channels in AOCs with Coherent multimode fiber (MMF) cables that reach up to 100 m in data center connections.

All optics and cables released by Dell Networking have passed comprehensive optical analytics check as well as an extensive dynamic test suite. Dell-labeled optics are warrantied alongside the Dell ...

A transceiver built to QSFP28 standards can seamlessly operate in any host system that adheres to the same mechanical and electrical guidelines — regardless of the vendor.

Warranty Intel® Ethernet Optics have a limited warranty of three years from the date of shipment.
