Wear long sleeves when entering the electrical distribution box

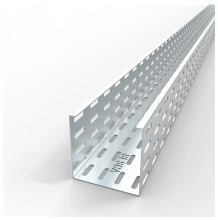

Overview

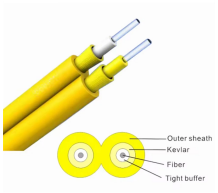

Electrical workers shall wear arc rated natural fiber apparel such as long sleeve shirts, long pants, jackets, coats, bib overalls, or coveralls to protect the torso and limbs from arc flash hazards. Wearing appropriate protective gear is critical for electricians to mitigate risks associated with electrical work. These safety measures not only safeguard against hazards but also comply with industry standards and regulations. Electricians face various electrical hazards daily, including shock. The Electrical Personal Protective Equipment (PPE) program provides requirements to ensure electrical workers are protected from electrical hazards while working on electrical equipment. Employees who work with electrical equipment shall be provided with appropriate electrical PPE and be.
