

What does AUG mean in the core switch

Overview

An Aggregation or "Top-of-Rack" switch is designed to connect everything in a rack at high speeds, then have an even bigger pipe out to the rest of the network. The Pro Aggregation does this with it's SFP28 25Gbps ports. A core switch in networking serves as the high-capacity backbone, italic centralizing data flow and ensuring efficient communication between different network segments. It is intended for administrators responsible for installing, configuring, and managing Aruba switches on a network. Updates to this document can occur after initial publication.
