What kind of faceplate is best for fiber optic connectors

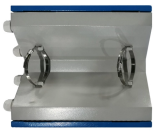

Overview

A Fiber Optic Socket Wall Outlet, also called a fiber optic faceplate or optical termination outlet, is a mounted interface designed to house and protect fiber optic terminations, such as SC, LC, or ST connectors. As data demands surge globally, the need for robust, well-organized, and high-performance network. From MDU corridors to private homes and high-rise apartments, the right faceplate simplifies installation, protects connections, and enhances user experience. Fiber faceplate s and glass plates are two commonly used fiber termination solutions, yet they differ significantly in material, functionality, usage scenarios, and installation methods. High Compatibility: Suitable for various fiber types and network equipment.
