

What model is the 955 beam splitter

Overview

The 35-955 is a 50 x 50 mm 70:30 (R:T) Plate Beamsplitter, designed and manufactured by Edmund Optics. This beamsplitter is part of the N-BK7 Schott family, a popular choice for its excellent optical properties and versatility. The beamsplitter has a. Our team of experts is available to assist you with any questions regarding our products in photonics and ultra-trace analysis. We provide independent advice and offer fair conditions. All of Seiler's Colposcopes can be equipped with live video and/or a digital camera. Accessories: Contact us for.

What model is the 955 beam splitter

Beamsplitters are optical components used to split input light into two separate parts. Beamsplitters are common components in laser or illumination systems. Beamsplitters are also ideal for fluorescence ...

The 955 Series Colposcope offers 5 levels of magnification combined with the comfort of the swing arm technology and comes standard with LED Illumination (Halogen is optional).

The diffractive beam splitter is used with monochromatic light such as a laser beam, and is designed for a specific wavelength and angle of separation between output beams.

The Seiler 30955-5LED-D/A 955 Model, Swing Arm, 5 Steps Magnification, ...
